

## School Age Program

The Family Learning Center provides a variety of after-school tutoring, mentoring, sports, cultural and art programs for approximately 500 school age children per year. This program is designed to lead children into a positive, healthy future. The center holds computer and Internet access programs that promote academic achievement in an effort to close the “digital divide.” Other center events include back-to-school supply kits, summer recreational programs, community service and teen nights. The Family Learning Center teaches children ethical and civic development and promotes community service.
